ARIEL VIEW SOLUTIONS

Fractional CIO · IT Assessment · Nonprofit Technology Strategy

Alan Ariel | aariel@arielviewcio.com | (502) 714-8344 | Noblesville, IN

I help nonprofits get more mission impact from their technology.

Whether you are navigating fragmented systems, a mandated platform change, or need senior IT leadership without a full-time hire — I step in as an honest broker, assess the situation, and build a path forward your board can trust.

WHAT I DO

Fractional CIO

Senior IT leadership without the full-time cost. Strategy, vendor management, and board-level communication for organizations that need direction, not headcount.

Technology Assessment

Independent, honest evaluation of infrastructure, governance, and vendor landscape — often the required first step for UWCI Technology Fund grant applications.

Grant-Funded Technology Projects

Scope-of-work development and project execution for UWCI Technology Fund and similar grants — from assessment through implementation.

SELECTED EXPERIENCE

Fractional CIO	Ongoing fractional CIO engagement; technology assessment, vendor evaluation, and infrastructure modernization for a veterans services organization.
Enterprise-Scale Assessment	500-employee, $18M+ disability services organization; full technology and vendor landscape assessment.
Community Assessment	Identified critical gaps in staff mobility, client data protection, and workflow automation for a community services nonprofit.
Active Engagement	Technology assessment addressing platform governance, vendor integration, and organizational process for statewide community services provider.
Regulated & Healthcare-Adjacent	Direct experience with the compliance, data governance, and reporting demands of regulated and healthcare-adjacent organizations.
UWCI Technology Fund	Twelve grant applications authored for client organizations, with the majority funded.

WHY ARIEL VIEW SOLUTIONS

Honest Broker

No vendor relationships. No product to sell. I will tell you when you are not ready for a technology investment — including AI — as readily as you are.

Mission-First

Naval Officer. Former nonprofit board president. Technology is a means, not the end — every recommendation is filtered through what actually serves your mission.

Stabilize, Improve, Advance

Secure the foundation. Align systems to how you actually work. Build capacity for mission growth. A practical methodology built for resource-constrained teams.
